Summer 2021

Our Shareholders Come First WE ARE SUGPIAT!®

LETTER FROM THE CHAIRMAN

Cama'i Shareholders,

As we surface from the Covid Pandemic, AKI is looking forward to having a productive 2021. The Shareholder's Informational Meeting was conducted in Kodiak Island on May 29, 2021 with a good turnout by our Shareholders. Our Shareholder Relations Department conducted training on Burial Assistance, Stock Will, and Scholarships & Grants programs. Additionally, Ms. Sarah Walker from Bureau of Indian Affairs (BIA) made a presentation on Certificates of Indian Blood which raised lots of important questions from our Shareholders pertaining to the application process. The Kodiak Shareholder Informational Meeting was the first of many informational meetings that will be conducted each year to allow for regular interactions with our Shareholders.

I am pleased that the United States Supreme Court recently issued a decision in favor of Alaska Native Corporations regarding the Department of Treasury in the

CARES Act litigation brought by several tribal entities that sought to exclude Alaska Native Corporations from receiving funding from the CARES Act. However, at this point, we do not know how much funding is available nor when the funds will be received by Akhiok-Kaguyak, Inc.

Our Sugpiat Government Services Group of 8(a) companies continues to build their business lines supporting Federal Government Agencies and the Department of Defense. As we grow, our profits will provide the funding for the Shareholders Assistance Program (SAP) that will be created over the next 12 months.

Letter from the Chairman, continued

These profits will also assist with the monitoring and protection of AKI Lands. In efforts to protect our Sugpiat cultural lands, the AKI Board of Directors tasked our corporate management to develop a Lands Monitoring and Protection Program to ensure we are actively protecting our lands for future generations. The first step in the process was to create signage that clearly marked the boundaries of our lands. These signs were placed strategically starting with our petroglyphs and working outward throughout Akhiok, Kaguyak, Moser Bay, and Olga Bay. By utilizing the knowledge and skills of our Shareholders, we have and will continue to position signs in key areas which will serve as a warning to transporters and trespassers that AKI has begun a program to Monitor and Protect our lands. This is only the first step of a larger program that we are developing to ensure that our future generations have a solid lands management program in place to protect our ancestral lands.

Quyana,

Robert Simeonoff

WEBSITE UPDATES

As our company continues to grow and evolve, so do our websites.

Most recently, the Jadin Tech team revamped their site. The website now showcases the six primary service sectors: Security Assistance, Cybersecurity, Infrastructure & Logistics, Munitions, Aviation, and Software Development.

To learn more about these areas and the markets we support, visit www.jadintech.com!

Notice of the

42ND ANNUAL MEETING OF SHAREHOLDERS

Saturday, September 25, 2021 at 10:00 a.m.

The AKI Board of Directors invites you to attend the 42nd Annual Shareholders Meeting!

We will be electing three board members at this meeting. Please keep your mailing address up to date during these next few months so you don't miss any upcoming reminders, newsletters, and proxy materials.

This year we will be meeting at the Kodiak Convention Center that overlooks the boat harbor. Registration will begin at 9:00 a.m. and the meeting will begin at 10:00 a.m.. Lunch will be served at noon, and door prizes will be given throughout the meeting.

We look forward to seeing you so please plan on attending this meeting. We will be presenting how our company has grown in the last year and what AKI is planning for our FUTURE!

SUGPIAT DEFENSE, LLC

Integrated Visual Augmentation System (IVAS) Testing

SUGPIAT DEFENSE PERFORMS IVAS TESTING FOR THE U.S. ARMY

In April of 2020, Sugpiat Defense, LLC was awarded the Cybersecurity Engineering, Analytical Experimental, and Research Services contract to provide cybersecurity services in support of the warfighters at various regional locations throughout the United States for the United States Army Futures Command, Development Command Data Analysis Center, and Cyber Experimentation & Analysis Division. The Army's Integrated Visual Augmentation System (IVAS) is one of the Special Projects that we support at White Sands Missile Range, NM. The IVAS system essentially works as a heads-up display in the form of goggles. The goggles provide the status of each soldier showing hydration, fatigue, stress, and temperature.

IVAS is being developed and used to reduce the number of combat devices individual soldiers will need to carry such as thermal and night vision goggles, phones, and computers. It will allow the warfighter to do much of what can be done on a computer but while looking through glasses instead of down at a phone or a computer screen. The IVAS is a specially modified version of Microsoft's HoloLens 2 headsets which the Army plans to use to better train Soldiers and make them more effective in actual combat situations. Other applications

may include placing sensors in a variety of locations so a soldier might be able to see the view from a sensor mounted on a drone and use it to locate fellow soldiers or enemy combatants. These applications suggest putting the sensors, rather than soldiers, in harm's way. It is a way to deliver a platform that will keep soldiers safer and make them more effective.

Sugpiat Defense, LLC tests IVAS equipment to enhance safety and mission effectiveness for our warfighters.

The IVAS equipment is the ruggedized military form factor with integrated low light and thermal sensors, Tactical Assault Kit (TAK) software and maps, and rapid target acquisition.

The IVAS technology places objects such as maps or video displays, such as a hologram overlaid on top of the real world in front of the soldier. This device will allow the soldiers to interact using hand and voice gestures. IVAS is said to help soldiers' sight and identify enemy combatants, as well as provide night vision and thermal imaging. The sensors will act as external eyes, their view accessible through the headset. The Army is in the beginning stages of understanding everything the IVAS system can do for soldiers and Sugpiat Defense is assisting in that testing while also working to improve the device's cyber security.

Through the hard work we have demonstrated during our first year on contract with DEVCOM DAC, Sugpiat Defense has received "Exceptional

CPARS" and is looking forward to continuing this trend for years to come. Congrats to the WSMR CEARS Team for the outstanding work supporting the DEVCOM, Combat

Capabilities Development Command (CCDC) Data Analysis Center (DAC) customer at regional locations.

We Are Sugpiat!®

SUGPIAT DEFENSE SUPPORTS NIWC PAC

Akhiok Kaguyak, Inc. (AKI), is proud to announce our subsidiary Sugpiat Defense, LLC has been awarded a prime IDIQ contract to provide Systems Lifecycle Engineering, Cybersecurity and Security Engineering Support Services in support of Naval Information Warfare Center Pacific (NIWC PAC) Cyber Engineering & Integration (CE&I) Division.

This contract utilizes and demonstrates Sugpiat Defense's in-depth understanding and execution of process development and progress monitoring for the entire hardware/software life-cycle process.

DEPARTMENT OF EDUCATION SEEKS CONTRACT RENEWAL

Sugpiat Defense, LLC currently supports the Department of Education (ED) on the Fraud and Information Communications Technology Supply Chain Risk Management contract. The contract is designed to develop Department of Education policies and processes, predict and mitigate cyber supply

chain risks, and develop a technical approach for using Machine Learning and Artificial Intelligence for automating advanced persistent threat prediction and the detection of technology counterfeits.

To date, the Sugpiat Defense Information and Communication

Technology (ICT) Supply Chain risk analysts have analyzed a variety of supply chain threats and risks, provided mitigation recommendations for risk reduction, and have created multiple policies and processes that serve as the foundation for the entire supply chain risk management program.

The customer has expressed great confidence in our contributions and prefer our analytical approaches over competitors in the same competitive space. This preference has not only led to an interest in continuing our contract support but has also led to a desire to increase the contract scope. ED has also adopted the use of **Mr. Drew Buchanan's** ICT Supply Chain Risk Management tool, which Mr. Buchanan created. The tool quantifies the likelihood of supply chain risk exposure across the entire supply chain lifecycle using multiple vulnerability and threat data points and incorporates conditional probability theory formulas to predict mission impact and prioritize risk management activities.

Drew Buchanan
Chief Cyber Security Officer

TEAM SUGPIAT ESCORTED LAPD MOTORCADE

Earlier this year, support vehicles were part of a motorcade with the Los Angeles Police Department (LAPD) escorts through parts of southern California to Cal State University Long Beach vaccination site for site visit.

This last minute requirement for Sugpiat Defense, LLC (SD) had no preliminary intel regarding the destination, but **Juan Garcia, Hernan Lopez, and Filiberto Guizar** of SD have had operational driving courses in order to navigate situations that require "defensive driving" to extricate passengers from dangerous situations. They were prepared two hours prior to arrival for LAPD to run vehicles with bomb sniffing dogs and then isolating them until execution.

Our three vehicles trailed the escorts without emergency warning lights. The vehicles had to fend off third party vehicles trying to merge into the motorcade necessitating our vehicles to hug each others bumpers, flash lights and maneuver safely as they blew red lights within the confines of the motorcade directive.

Team Sugpiat and the 61 Civil Engineering & Logistics Squadron (CELS) is now exploring obtaining removable emergency warning lights for vehicles that may be required in future support of distinguished visitors.

Sugpiat Defense drivers Juan Garcia, Hernan Lopez, and Filiberto Guizar are pictured far right.

AKHIOK-KAGUYAK, INC. SHAREHOLDER ANNOUNCEMENTS!

2021 AKI SHAREHOLDER INFORMATION MEETING

AKI held a Shareholder Information meeting on May 29, 2021 in Kodiak at the Best Western Harbor Room. The meeting was attended by nearly 30 shareholders with family members. The Certificate of Degree of Indian Blood was presented by Sarah Walker, Acting Tribal Operations Officer for the Bureau of Indian Affairs, and the AKI Stock Will, Burial Assistance, and Scholarships & Grants forms were presented by Cheryl Eluska Anderson. After the program, we had time for the shareholders to fill out and notarize stock wills and burial assistance forms to be submitted.

AKI is launching a campaign to get all AKI Shareholders to file a Stock Will. To date, AKI only has 30% of its shareholders with a Stock Will and Burial Assistant form filed with the company. **Help us reach our goal of 100% by December 31, 2021!**

**Submit & Win
REAL MONEY**

\$250 CASH PRIZE

**Complete or Update a Stock Will and be Eligible
for a Free Drawing to Win \$250!**

Stock Will forms are available at www.AKI-Kodiak.com/our-shareholders
Or at the Shareholder Headquarters in Anchorage
Questions: (907) 258-0604 or email info@aki-kodiak.com

Wills Must be Received by the Following Dates:
(1) July 31, (2) August 31, (3) September 30, (4) October 31,
(5) November 31, and (6) December 31

AKI Shareholders are encouraged to complete and maintain an updated ANCSA Stock Will. This is important to express your wishes so upon passing one's shares will go to heirs based upon a written will, without disputes.
